SUMMARY

Front End Developer adept at creating successful websites that meet customer needs. Specializing in collaborating with clients and customers to gather requirements, produce plans and improve designs for usability and functionality. Hardworking and passionate job seeker with strong organizational skills eager to secure a Developer position.

PROJECTS

▪ **Hair Salon Website:** This project uses only HTML5 and CSS. The purpose of this project was to replicate a developed web page from start to finish and make it look as close to what the real website looked like. This project used CSS flex-box and grid a lot, and I think the project shows that I know how to use those principles.

▪ **Beer App**: This project was about utilizing a third-party api and using HTML, CSS, JavaScript, and React to create a small but efficient way to showcase which beers people liked by simply by clicking a like button on each beer someone liked from the list of beers. It basically renders a list of beers on a web page from a Beer API, and maps over each beer and then gives you the option to like those beers. It was a simplistic project, but I think it actually would be a great webpage if it were developed further.

▪ **Small Business Page** - Utilizing React tools: Redux, State, Store, Components, Containers, and Props in order to pass data to and from the main javascript file. The project also uses CSS, HTML5, and inline css styles.
The problem that this project solved was to build a Small Business Page for Affton, Missouri Businesses. The project also uses the google maps REST api, and modals to showcase adding and deleting businesses from the page.

▪ **Community Disc Golf Capstone** - This application uses React, SQL, Amazon AWS Database, Redux, State, Props, Components, Containers, Netlify for front end hosting, and Vercel for back end hosting, HTML5, CSS, Json Web Tokens, cookies, and ReduxThunk. The problem that this project was trying to solve was to create a full-stack web page from start to finish for Disc Golfers to have easier access to score cards, and information about the courses that they could play at if they were anywhere in the world. This application uses google maps API as well, and is super helpful if you are trying to look-up courses that you are wanting to play at, and leave notes for yourself inside of your own dashboard..[The Page is still in development but the main concepts are there and I'm continuing to build pieces on a daily basis.]
Front End Link: https://github.com/chenr03/frontendcapstone.git [npm start forever in node.js terminal] - Issues with Vercel currently.

SKILLS

▪ Staff Recruitment, Hiring, and People Management
▪ Front-End Skills: HTML, CSS, JavaScript, React JS, Node JS, Express Framework
▪ JS Libraries and Frameworks
▪ XML TypeScript
▪ Back-End and Database Skills
▪ Responsive Web Design
▪ RDMS Development and MySQL
▪ Rest API Design

EDUCATION

▪ Austin Coding Academy: Full-Stack Certification (completion date February 2023)
▪ University of Missouri - Bachelors of Science - Sociology; emphasis Finance and Marketing
▪ Completed 3 years of Spanish Language instruction (Multicultural Certification Degree)

EXPERIENCE

BMO Harris Bank   July 2017 -- Dec. 2022
Bank Manager

▪ Found various ways to help motivate employees to reach and exceed daily, weekly, and monthly sales
goals, all while providing the highest quality of customer service to all customers.
▪ Generated own leads for the branch through customer leads, lists, and creativity that lead to over 2
million dollars in loan sales, 100% to retail goals, and 217% business sales goals month over month.
▪ Opened over 250K in SBLOC accounts and opened at least 100 new to bank Business DDA accounts
▪ Delegating tasks to employees appropriately while encouraging growth and career development.
▪ Ensured that all customers received the greatest customer experience possible by recommending
products and services that fit the customer's needs.
▪ Worked on computers and networking issues for the entire branch on a daily, and weekly basis.

Commerce Bank   April 2016 -- July 2017
Retail Banker

▪ Achieved growth in 2021; Q1, Q2 and Q3 by asking needs based questions and having holistic in depth
conversations. On pace to make Yearly goals. At 117% of my goal year to date.
▪ Both Digital Banking & Bank at Work Champion - Opened 36 new dda accounts at 2 BAW Events in 2020.
▪ Processed 5 Home Equity Lines of Credit in each month for the last year, resulting in over 1 million in new
loan dollars for the bank.
▪ Coached Tellers and Bankers for 2 years in their elevator pitches & transitional statements, as well as how
to utilize my financial compass tool, & max cues, in order to help customers make real financial progress.
